

Git & GitHub

Step 1: Create GitHub Account

1. Open [GitHub](#)
 2. Click on Sign Up
 3. Enter:
 - Email ID
 - Password
 - Username
 4. Verify email and complete registration.
-

Step 2: Install Git

1. Download Git from:
[Git Download Page](#)
 2. Install Git with default settings.
 3. Verify installation using command: `git --version`
-

Step 3: Configure Git

Open Command Prompt / Terminal and type:

```
git config --global user.name "Your Name"
git config --global user.email "yourmail@gmail.com"
```

Check configuration:

```
git config --list
```

Step 4: Create Project Folder

Create a folder for the practical.

Example:

```
mkdir WAD_Practical3
```

```
cd WAD_Practical3
```

Create a sample file:

```
echo "Hello GitHub" > index.html
```

Step 5: Initialize Git Repository

```
git init
```

This creates a local Git repository.

Step 6: Add Files to Staging Area

```
git add .
```

Check status:

```
git status
```

Step 7: Commit the Files

```
git commit -m "First Commit"
```

Step 8: Create Repository on GitHub

1. Login to [GitHub](#)
2. Click **New Repository**
3. Enter repository name:

WAD_Practical3

4. Click **Create Repository**
-

Step 9: Connect Local Repository to GitHub

Copy repository URL from GitHub.

Example:

```
git remote add origin https://github.com/username/WAD_Practical3.git
```

Check remote:

```
git remote -v
```

Step 10: Push Code to GitHub

```
git branch -M main
```

```
git push -u origin main
```

Enter GitHub username and password/token if asked.
